

Ready-to-use disinfectant for the quick disinfection of dental impressions.

actisolve® imprespray is a ready-to-use solution for the rapid disinfection of dental impressions and impression trays. actisolve® imprespray does not affect the dimensional stability of dental impressions made of alginate, polyether, polysulfide, A-silicone, and C-silicone.

INSTRUCTIONS FOR USE

For your protection, wear disposable gloves and safety goggles. Completely moisten the dental impression and impression tray and leave disinfectant to act. Adhere to, but do not exceed, the indicated contact time. After disinfection, rinse the dental impressions thoroughly under running water of at least drinking-water quality for 10 seconds. Use on alcohol-compatible materials only. A list of compatible and incompatible materials is available on our website. If you are unsure about the material composition of the medical device to be disinfected, contact the manufacturer before use. Any serious incident that has occurred in relation to the device should be reported to the manufacturer and the competent authority of the Member State in which the user and/or patient is established.
