

Economical disinfectant concentrate for medical and dental instruments.

actisolve® instrusafe eco is an economical concentrate for the manual disinfection of medical and dental instruments made of stainless steel, tungsten carbide, diamond grit, titanium, silicon carbide, and silicone. Also suitable for alcohol-sensitive rotary instruments. actisolve® instrusafe eco is free of aldehydes, phenols and chlorine.

INSTRUCTIONS FOR USE

For your protection, wear a laboratory gown, household gloves and safety goggles. Prepare the working solution according to the dosing table. Fully immerse the instruments and adhere to the indicated contact time. After disinfection, rinse the instruments thoroughly under running water of at least drinking-water quality for 10 seconds. Visually check the instruments after disinfection for contaminants. If necessary, remove contaminants with a brush and repeat the disinfection process. Replace the working solution daily or when visibly contaminated. The disinfectant solution is also suitable for use in ultrasonic cleaning devices. Adhere to the reprocessing recommendations of the instrument manufacturer. A list of compatible and incompatible materials is available on our website. If you are unsure about the material composition of the medical device to be disinfected, contact the manufacturer before use. Any serious incident that has occurred in relation to the device should be reported to the manufacturer and the competent authority of the Member State in which the user and/or patient is established.
