

# DENTIRO® Omni Wipes

**Disinfectant wipes with a low alcohol content for medical devices.**

## Intended Purpose

DENTIRO® Omni Wipes are ready-to-use disinfectant wipes with a low alcohol content. The disinfectant wipes are suitable for the rapid disinfection of surfaces of non-invasive medical devices such as operating tables, gurneys, IV poles, and dental chairs.

## Intended User

The product is intended for use by dental or healthcare professionals with knowledge about the disinfection of medical devices. The product is not to be used directly on patients.

## Instructions for Use

Write the use-by date after opening on the dispenser tub. For your protection, wear disposable gloves and safety goggles. Insert the refill pouch into the designated dispenser tub. Before first use, cut open the refill pouch. Pull the first wipe from the centre of the roll through the star-shaped opening in the lid. Close the dispenser tub firmly after each use. Completely moisten and wipe the entire surface of the medical device. Leave the disinfectant to act and adhere to contact time. Wipe medical devices that come into contact with skin using a water-soaked single-use cloth to prevent the build-up of biocides. Use on alcohol-compatible materials only. Before first use, check material compatibility on a small, inconspicuous area. A list of compatible and incompatible materials is available on our website. If you are unsure about the material composition of the medical device to be disinfected, contact the manufacturer before use. Any serious incident that has occurred in relation to the device should be reported to the manufacturer and the competent authority of the Member State in which the user and/or patient is established.

## Limitation

FOR PROFESSIONAL USE ONLY. Not intended for use on invasive medical devices. Do not mix with other products. Ensure that all visible soiling has been removed before disinfection. Do not re-use the wipes. Failure to adhere to these limitations may reduce the efficacy of the product, thereby increasing the risk of infection.

## Handling

DANGER H228 Flammable solid. H319 Causes serious eye irritation. P210 Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking. P233 Keep container tightly closed. P280 Wear protective gloves/protective clothing/eye protection/face protection. P305 + P351 + P338 IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. P337 + P313 If eye irritation persists: Get medical advice/attention. P501 Dispose of contents/container in accordance with local and national regulations. Further information can be found in the Safety Data Sheet available on [oroclean.com](http://oroclean.com).

## Storage

Store in a cool, dry and well-ventilated place. Keep away from direct sunlight, heat, and open flame. Storage temperature: < 30 °C. Dispose of the refill pouch 7 days after opening. Write the use-by date after opening on the dispenser tub.

## Physical Properties

|   |  |
|---|--|
| Physical state: Liquid absorbed on fleece | pH-value: Neutral                          |
| Colour: Colourless                        | Shelf life: 24 months (unopened container) |
| Scent: Of alcohol                         |  |

## Composition in 100 g

100 g moisturizing solution contains 7.5 g ethanol, 15 g isopropanol, 0.76 g quaternary ammonium compounds, auxiliaries and water.
