

DENTIRO® Zero

Alcohol-free surface disinfectant for medical devices.

Intended Purpose

DENTIRO® Zero is an alcohol-free, ready-to-use solution for the fast disinfection of non-invasive medical devices with sensitive surfaces such as dental chairs. DENTIRO® Zero is suitable for the disinfection of alcohol-sensitive materials such as artificial leather, Plexiglas®, and PVC..

Intended User

The product is intended for use by dental and healthcare professionals who have knowledge of the disinfection of medical devices. The product must not be used directly on patients.

Instructions for Use

For your protection, wear disposable gloves and safety goggles. Completely moisten and wipe the entire surface of the medical device. Leave the disinfectant to act and adhere to contact time. Wipe medical devices that come into contact with skin using a water-soaked single-use cloth to prevent the build-up of biocides. Before first use, check material compatibility on a small, inconspicuous area. A list of compatible and incompatible materials is available on our website. If you are unsure about the material composition of the medical device to be disinfected, contact the manufacturer before use. Any serious incident that has occurred in relation to the device should be reported to the manufacturer and the competent authority of the Member State in which the user and/or patient is established.

Limitation

FOR PROFESSIONAL USE ONLY. Not intended for use on invasive medical devices. Do not mix with other products. Ensure that all visible soiling has been removed before disinfection. Failure to adhere to these limitations may reduce the efficacy of the product, thereby increasing the risk of infection.
