

Ready-to-use solution for the disinfection and cleaning of dental rotary instruments.

- Fully virucidal within 30 seconds
- Highly effective even in the presence of blood and proteins
- Broad effective spectrum
- Time-saving application

actisolve® rotasafe is a ready-to-use solution for the disinfection and cleaning of rotary instruments made of stainless steel, tungsten carbide, diamond grit, ceramic, polymer, and silicone.

INSTRUCTIONS FOR USE

For your protection, wear a laboratory gown, household gloves and safety goggles. Immerse the rotary instruments immediately after use in the disinfectant solution. Adhere to but do not exceed indicated contact time. After disinfection, leave the rotary instruments to dry. Do not rinse with water. Visually check instruments after the disinfection for contaminants. If necessary, remove contaminants with a brush and repeat the disinfection process. Replace working solution daily or when visibly contaminated. The disinfectant solution is also suitable for use in an ultrasonic cleaning device. Adhere to reprocessing recommendations of the instrument manufacturer. Use only with alkaline and alcohol compatible instruments. Not compatible with aluminium. A list of compatible and incompatible materials is available on our website. If you are uncertain as to the material composition of the medical device, contact the manufacturer before use. Any serious incident that has occurred in relation to the device should be reported to the manufacturer and the competent authority of the Member State in which the user and/or patient is established.
