#### **SECTION 4: FIRST AID MEASURES**

#### 4.1 Description of first aid measures

General notes: Never give anything by mouth to an unconscious person. Place patient in

recovery position and ensure airway patency. When in doubt or if feeling unwell seek medical assistance. Show the safety data sheet and label to the physician. No action shall be taken involving any personal risk or without suitable training. It

may be dangerous to the person providing aid to give mouth-to-mouth

resuscitation. When it is suspected, that there may still be harmful vapours/fumes

present in the air, respiratory protection (mask; self contained breathing apparatus) must be used. Wash contaminated clothing with water before

removing or use gloves.

After inhalation: Remove patient to fresh air - move out of dangerous area. In case of

unconsciousness bring patient into stable side position and seek medical attention. If breathing is irregular or respiratory arrest occurs provide artificial respiration. Keep at rest in a position comfortable for breathing. Seek medical

help immediately.

After contact with skin: Take off all contaminated clothing. Areas of the body that have come into contact

with the product must be rinsed with water. Immediately obtain professional

medical help.

After contact with eyes: Immediately flush eyes with running water, keeping eyelids apart. After 5 minutes

of rinsing, remove contact lenses, if present, and continue rinsing. Consult a

physician immediately.

After ingestion: Do not induce vomiting. Rinse mouth thoroughly with water. Never give anything

by mouth to an unconscious person. Immediately consult a doctor. Show the

physician the safety data sheet or label.

#### 4.2 Most important symptoms and effects, both acute and delayed
